PLEASE NOTE

In some equivalents shown in this book there may be slight differences – i.e. in dimensions, in dissipations or in some mechanical or electrical characteristics, etc. – between the types listed in the first column and those listed in the last four columns of the tables. Therefore, if the conditions under which the replacement IC operate, are critical, reference should be made to the appropriate manufacturer's literature before a final replacement choice is made.

BP14: SECOND BOOK OF TRANSISTOR EQUIVALENTS AND SUBSTITUTES
AUTHOR: B.B. BABANI — **PRICE: 95p**
ISBN: 0 85934 013 9 — 224 Pages
Approx. Size: 180 x 105 mm
This handbook has been specially prepared by the author as many thousands of new types of transistors have now been released on to the world markets since the publication in February 1971 of the 'First Book of Transistor Equivalents and Substitutes' (BP1 – 80 pages: 40p). The 'First Book of Transistor Equivalents' has had to be reprinted 13 times. The 'Second Book' produced in the same style as the first book, in no way duplicates any of the data presented in it. The 'Second Book' contains only entirely new material and the two books complement each other and make available some of the most complete and extensive information in this field. The original unique features have been retained making for very easy use by amateurs, engineers and industrial users. The interchangeability data covers semiconductors manufactured in Great Britain, USA, Germany, France, Poland, Italy, East Germany, Belgium, Austria, Netherlands and many other countries. Immediate equivalents are shown and possible substitutes are also included for the first time, as in the 'First Book', all the latest C.V. listings for all types of transistors have been included.

202: HANDBOOK OF INTEGRATED CIRCUITS (IC's) EQUVALENTS AND SUBSTITUTES
